DETAILED ACTION

Applicant's arguments filed 1/28/08 have been fully considered but they are not persuasive. See discussion below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 24-39,42,44-47,70-76,78-82,86,91,96-99,117 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not describe the addition of fluorescent pseudomonad or bacteria in general to the composition disclosed in the instant method. Note, parts of the invention are clearly taught in the specification such as fluorescent pseudomonad having the ability to degrade essential oils and the application to soil, foliage, seeds and fruits a composition comprising an essential oil. However, again the specification does not clearly describe the addition of fluorescent pseudomonad or bacteria in general to the composition disclosed in the instant method.

Response to Applicant arguments

The Applicants direct the Examiner's attention to the instant specification at page 9, lines 9-20 which recites "All seeds were treated with a mixture of chitosan (80%) and

essential oil from *Thymbra spicata* var. *spicata* (20%) and planted in sterile soil. The bacterial treatment contained $1 \times 10^{+6}$ CFU/mL *P. fluorescens* TR97 suspended in the chitosan/essential oil mixture. The Applicants further directs the Examiner's attention to page 9 Figures 8 and 9 which are to a composition containing the claimed bacteria, essential oil and a suspending agent. The composition was made and tested (Figures 8 and 9).

The Examiner maintains that the original specification appears to provide no support for a fluorescent pseudomonad being added to a composition comprising an oil-in-water emulsion. In applicants' citation (page 9 lines 9-20, Figures 8 and 9), the Examiner does not see support for an oil-in-water emulsion comprising a *P. fluorescens*.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
